ISCESTI-2025

Department of Civil Engineering,
NIT Patna, Bihar, India

May 14-16, 2025
Centenary Year Celebration

ABOUT NIT PATNA

National Institute of Technology Patna was formerly known as the Bihar College of Engineering Patna, a constituent engineering College under Patna University, until 27th Jan 2004. It was rechristened NIT Patna on 28th Jan 2004 as an Autonomous Institute under the Ministry of Education, Govt. of India. The Institute imparts high-level education, training, research, and development in Science, Engineering, Architecture & Planning, Humanities & Social Sciences and Technology along with high-quality education and values at UG, PG, and Ph.D. levels. National Institute of Technology Patna has an overall NIRF ranking of 55.

ABOUT THE DEPARTMENT

The Department of Civil Engineering is the oldest and vibrant department of the institute, which was established along with the inception of the Institute in the year 1924. The Institute was formerly known as the Bihar College of Engineering Patna, a constituent engineering college under Patna University, until 27th Jan 2004. It was rechristened to National Institute of Technology Patna on 28th Jan 2004 as an Autonomous Institute under MHRD, Govt. of India. The Department of Civil Engineering is committed to provide quality teaching and research opportunities to its undergraduate, postgraduate and doctoral students. The Department is actively involved in international and national research projects, and high valued consultancy works for the Government, Private Sector and Industries.

THEMES

- Geotechnical and Geo-environmental Engineering.
- Soil dynamics and Earthquake Engineering
- Rock mechanics, Tunneling and Underground structures
- Innovations aimed at reducing water, solid waste, air and noise pollution and monitoring environmental pollutants
- Technologies and approaches for reducing waste, improving recycling processes and promoting a circular economy
- Engineering strategies for preserving ecosystems, managing natural habitats and supporting biodiversity

- New technologies in structural design and construction
- Computational mechanics/Numerical modeling and simulation based techniques in the field of Structural Engineering
- Traffic and pedestrian operation, management and safety
- Transportation planning, design, policy and practices, demand modelling, transportation economics
- Pavement design, management, alternative low cost pavement materials.
- Urban and watershed water management, climate change
- Hydraulic and hydrological modelling, and innovation
- Renewable energy, CFD modelling and fluid flow phenomenon
- AI and ML in Civil Engineering
